

FLOORING PRODUCT LIST

	<p>Secura Exterior Flooring</p>	<p>While Traditional Compressed Fibre Cement (CFC) flooring is dense and a time-consuming installation, Secura™ exterior flooring sheets are lighter with tongue and groove joints. Pre-drilling and screwing is not required as they can be gun nailed, and underside mesh reinforcement provides extra strength and impact resistance. Sealed on all sides with an advanced polymer coating that helps adhesion and guards against moisture-related problems. Secura is great for tiled balconies and verandahs, providing extra peace of mind over particle board and plywood.</p>	<p><u>Secura™ exterior flooring Durable & easy to install</u></p>
	<p>Secura Interior Flooring</p>	<p>Scyon Secura™ interior flooring is a great option for wet areas such as bathrooms, as well as dry areas like bedrooms. Versatile, light and durable, Secura is dual function. While one side is designed for tiled applications and includes a sealant gap, the other side is perfect for vinyl or carpet applications where the tongue and groove joint is gapless. Secura also does away with the need for a vinyl underlay.</p>	<p><u>Internal bathroom or dry area flooring made easy.</u></p>

	<p>HardiePanel Compressed Sheet</p>	<p>HardiePanel™ is a compressed fibre cement (CFC) sheet for ceramic tile finishes over timber or lightweight steel joists. Used as substrate for tiled balconies and tiled internal wet-area floors, HardiePanel is a durable alternative to particle board and plywood and is resistant to damage from moisture.</p>	<p>HardiePanel™ Compressed Sheet Structural floor substrate</p>
	<p>Ceramic Tile Underlay</p>	<p>A smooth and stable internal underlay for ceramic tile finishes, James Hardie™ Ceramic Tile Underlay helps protect tiles against cracking caused by the movement that occurs naturally in timber, particle board and plywood substrates. Suitable for wet and dry area floors, the pre-sealed coating guards against moisture.</p>	<p>Protect floor tiles against movement.</p>
	<p>Vinyl and Cork Underlay</p>	<p>Helping to ensure floorboards are sturdy, long-lasting and eliminate movement, Vinyl and Cork Underlay is a high-quality internal underlay used over timber, plywood or particle board floors to provide a smooth base for laying either vinyl or cork flooring.</p>	<p>Protect vinyl or cork floors against movement.</p>
